

Clever Search

Search tricks that get you there faster:

- ➔ **Too many search results?**
Write two or more keywords in the search field. This narrows down the search.
Example: **animals deep sea**
- ➔ **Exclude search results:**
A minus sign (-) directly in front of a term tells the search engine that you are not searching for this word.
Example: **Dogs -Dachshund**
- ➔ **Find a specific group of words in a specific order:**
Use inverted commas
Example: „**blue wiener**“ (this is a type of rabbit)
- ➔ **Mega-professional trick:**
You can combine the search tricks in any order.
Example: **Animals Australia -Kangaroo**
